# NEW THIS YEAR...

- + Combining **multiple design themes** to create a unique style
- + **Layering lighting** to address multiple needs
- + **Opening up kitchens** while finding ways to isolate and conceal clutter
- + Creating **spa-like bathrooms** that enhance homeowner experiences while allowing seamless aging in place

## Designers are combining **multiple design elements** to create the perfect style for their clients

- Designers are combining a natural/organic feel with modern or contemporary design elements for **Organic Modern** designs.
- Evolving the Farmhouse style into a **Modern Farmhouse** look.
- Using earthy, muted colors and light wood tones to create **Nature Inspired** designs.
- Creating new **Modern designs** that support homeowner desires for a simple, minimalist, and clean look.

## Homeowners are looking to **open the look and feel** of the kitchen while adding elements that **hide clutter**

- **Large islands** with flexible functionality for food prep, dining, and work with charging stations.
- **Walk-in, built-in or butler's pantry** with food storage, small appliance work area and coffee station.
- **Walls/doors to conceal** small appliance workspace and minor food prep.
- **Attached mudrooms** to control incoming clutter.
- Adding **outdoor living areas** to expand the kitchen outdoors.

## Creating a **spa atmosphere** in primary bathrooms that homeowners can enjoy as they age in place

- **Neutral whites** in bathrooms with **blues and greens** and **medium wood** grains for warmth and spa-like feel.
- Bathroom **technology** to create a personalized environment, using app/voice controls for water and floor temperatures, as well as humidity monitoring.
- Large **two-person** showers with **doorless zero clearance entrances** and **multiple / rain showerheads** to create a spa-like feel and accommodate aging in place.
